

Welcome to TextureAndTones Spring boot app.

I am a developer as well as an artist so why not merge art and technology together!  
I am creating this small spring boot app that will return my art work based on the paintings name - In future I will create a basing UI as well for easy access.

Completed paintings -

1. Budha - <http://localhost:8080/image/Budha>
2. babyKrishna - <http://localhost:8080/image/BabyKrishna>
3. homeSweetHome - <http://localhost:8080/image/HomeSweetHome>
4. Gopuram - <http://localhost:8080/image/Gopuram>
5. girlAndGuitar - <http://localhost:8080/image/girlAndGuitar>

To view just the painting copy the above url or just replace the painting name instead of {paintingName} to - <http://localhost:8080/image/{paintingName}>

To view the making video of the painting you can use the below url in same way by just replacing the paint name - <http://localhost:8080/video/{paintingName}>
